Completely online courses, such as the one I am presently teaching, are going to be the death of the university system - not its saving innovation as they are made out to be. Plagiarism and cheating are incredibly common in my class - to the point wher Generally, I'm pleased with angel and recommend it to colleagues. I'll be trying to expand it to TA-taught sections this fall. A tutorial on those aspects would be helpful for me. I am looking forward to using ANGEL in the e-course I am developing for the Fall as weel in workshops and other settings. Thanks for asking.

Is there a way to reduce the size of the font for printing the grade sheet? My assignments do not fit on a single legal , horizontal page (I cannot print the last items on the grade sheet) I have called the help service in the Library and they have be

Keep up the great work! ANGEL is a wonderful tool. While I did not use it as extensively in the summer as I usually do in the school year, the students seem to really enjoy using it. Overall, I think it is a pretty good system. This summer was my first time using it, I had previously used Blackboard. I think in general, I like it as much or better than blackboard, but I preferred blackboard's handling of the grade book (although I pr The grade book is greatly improved The support services have saved me several times - many thanks to them.

1. Send regular messages to ALL students using Angel reminding them to do disk maintenance. 2. Send occasional (irregular) messages to all students using Angel to the effect that they should contact "Angel Help" at 355-2345 if they have a computer o

Having a VU producer available as i prepare to teach this course on-line entirely has been a great help, as she has been able to show me how to make better use of the technology and give me ideas about how to do things that I would not have thought of oth

I cannot think of anything right now. Once I hit a problem I sure it will come to me. I can't wait to learn more - every session I have been to has given me new ideas and for someone as technophobic as I am this is a well supported system and I enjoy using it and like how it has altered how we are able to teach our students. I tried calling ANGEL help once (from outside the US) and the attendees did not know what I was talking about (inspite of explaining it properly) - in the end they just told me to call back later as they was no one around that could help. I will go back to paper and pencil and skip the hassel. More direct and quicker responses to questions from faculty and students. Multimedia and more instructional design
